

PROJECT MANAGER, SOURCE TO PAY AND ERP INTEGRATION

ROLE

The Project Manager is responsible for the integration of Source-to-Pay (S2P) and Enterprise Resource Planning (ERP) solutions across a variety of industries and clients. As such, the Project Manager is required to:

- Evaluate, plan, organize, manage and control all activities in their assigned project(s) in collaboration with the integration team (functional and technical consultants) and client project team;
- Identify risks and develop the appropriate approach to minimize their impact;
- Organize and lead project meetings;
- Create winning conditions for our client and our integration teams to meet their project objectives;
- Evaluate team resources, coach on skills development and provide constructive feedback;
- Contribute to the continuous improvement of our delivery methodology of our services.

REQUIREMENTS

- Detail oriented to carry out the required project related administrative responsibilities;
- Demonstrated understanding of business processes across a variety of industries and clients
- Strong leadership skills to lead and build performing project teams
- Strong business acumen and diplomacy to manage effective stakeholder communications with consideration given to internal and client success based strategies
- Ability to balance a result oriented approach with the mindfulness associated with soft-skills

PROFILE

- University degree or other degree equivalency or experience equivalency
- Minimum five (5) years experience as a Project Manager;
- PMP or equivalent certification
- Excellent English skills with preference given to multi-lingual candidates (such as French and Spanish)
